

International Intensive Hands-on Musculoskeletal MRI & Ultrasound Course

(FOR RADIOLOGISTS ONLY)

24th – 27th March 2010
Holiday Inn, Penang,
Malaysia

General Information

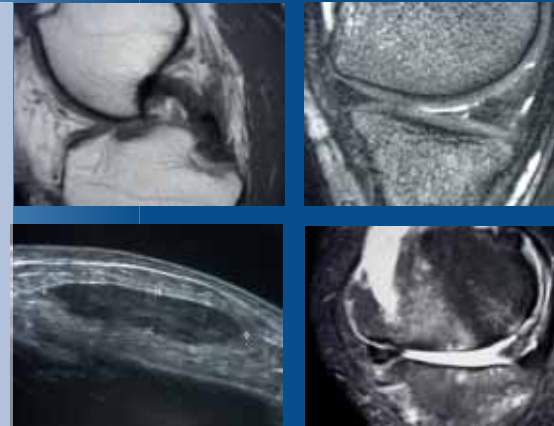

In Asia, there is a lack of accurate musculoskeletal (MSK) MRI reporting and ultrasound performance among general radiologists. Therefore, there is a need for training with emphasis on the strengths and weaknesses of MSK MRI and ultrasound in day-to-day practice.

This intensive, hands-on course allows radiologists to report on basic MSK MRI and perform screening and/or diagnostics ultrasound with at least 80% accuracy. Homework, together with a reporting template, will be given at the end of each day. These 7-10 cases, together with an additional 10 cases, shall be reviewed interactively the following day.

At the end of the course, participants should be able to:

- Perform MSK ultrasound.
- Detect most abnormalities of the joints, muscles and tendons using MRI and ultrasound.

If you are interested in participating in this course or any future courses, please contact the secretariat.

Faculty:

Faculty : (Musculoskeletal Radiologists)

Prof Dr John George FRCR

Professor of Radiology, Chief of Musculoskeletal Radiology, University of Malaya Medical Centre.

Dr Daniel Makes MD

Director of Ultrasound Training Center,
Indonesian Society of Ultrasound in Medicine.

Dr Lincoln Gillam FRANZR

North Coast Area Radiology Private Practice and Area Health Services, New South Wales, Australia.

Course Materials

1. Extensively detailed PowerPoint notes with images (for comparison with daily practices)
2. DVD containing actual MRI videos, PowerPoint slides and other useful, relevant materials such as the 'Meniscal calculator software'.

NOTE: It is MANDATORY to bring a laptop which can play DVDs. You will be required to download a specific software to play the MRI videos.
